

List of the Remaining Issues

Type	Page	Issue
Functionalities	Homepage	The donate button is currently changed to blog because the donate page is not up yet
	Be Supported	The wireframe is finished but is not implemented due to lack of time.
	Education	The "Attendance and Truancy" card doesn't have a link associated with it in the content manager database. The link is currently not working
	About us	The learn more under families in about us just links back to the home page
Organization	Be Supported Dropdown	Can be eliminated if the wireframe is implemented
	For Family Dropdown	Can be eliminated and be replaced with resource page once the resources page visual is improved
	Menu Bar	It's unintuitive to have the about page under the home tab, usually home is not a drop down menu. Further, personally for me the "about us" page is the first page I look for on an organization I'm not familiar with. I feel like that should be in the menu bar.
	Naming	IEP and Truancy are not user friendly terms.
Missing Info	Find a Therapist Truancy Military Families Grandfamilies Tip Sheets	Missing title and description on the top of the page
Visual	Education Military Families Grandfamilies	May need a revised background with more suitable images
	Helpers Tip Sheets Leadership	Currently has solid color background, can be replaced with more suitable images

	Father's Space Children & Youth Resources Suicide Prevention	
	Military Families	Wasn't able to find original photos, so the current ones has relatively low resolution
	Education Children & Youth Resources	Some of the cards (notably the F.A.T. workshop) have descriptions that are too long to fit on the card in the new template. Replacing them with shorter ones would help the layout.
	Log in	Log in button is too big, there is no sign up button
	Resources	The background, color, and descriptions can be further improved.
